Experienced Technical Program Manager with 10 years of expertise in software engineering, cloud technologies, and cross-functional leadership. Proven ability to drive complex, large-scale projects from ideation to launch, particularly in ambiguous and nascent technology spaces. Highly skilled in coordinating global teams, managing technical and business trade-offs, and delivering innovative solutions across Machine Learning, Cloud, and AI technologies. Looking to contribute my expertise to Meta's immersive computing future.

Career

2017-present **Customer Engineer - Google Cloud Platform, Google.**

- Led multiple cross-functional technical engagements, integrating cloud technologies with client requirements to deliver scalable, high-performance solutions for some of the world's largest enterprises and unicorn startups.
- Built strong relationships and acted as a trusted advisor to key decision-makers at major companies, driving cloud adoption and impacting up to \$500M Cloud revenue in 2024.
- Managed the end-to-end technical lifecycle of cloud projects, from requirements gathering and solution design to implementation, deployment, and ongoing support.
- Partnered closely with engineering teams and product managers to define and prioritize roadmap items, ensuring the delivery of high-quality, scalable software solutions across diverse domains.

2022 **Technical Program Manager - Google Assistant, Google.**

- Led two teams of Machine Learning engineers, delivering the first ML model in Chrome production, showcasing thought leadership and end-to-end program ownership.
- Revamped coordination processes across 80 offshore engineers, enhancing alignment and increasing project velocity by 20%.
- Defined and tracked OKRs to guide performance, drive technical excellence, and ensure timely project delivery.
- Created and monitored key metrics, leading to a timely and impactful course correction of shutting down one project in favour of a new approach.
- Refocused efforts into key user journeys by sunseting others, increasing user satisfaction scores by 10%.

2014-2017 **Technology Solutions Professional - Azure, Microsoft.**

- Played a pivotal role in the early days of cloud computing, pushing the frontiers of Azure adoption when cloud technology was still in its infancy and largely uncharted territory.
- Pioneered technical strategies that redefined how enterprises approached IT infrastructure, leading them away from traditional setups and into scalable, cloud-based architectures that future-proofed their businesses.

H1 2014 **Technical Evangelist - Azure, Microsoft.**

- Held keynotes and technical deep dive sessions at conferences, published reference architectures and authored whitepapers and blog posts.

2013-2014 **Co-Founder & Software Engineer - Android**, *HaxSync*.

- Created an Android application with over 100,000 downloads, ranking in the **top 100** paid apps and maintained a 4,4 user rating by delivering unique value to the user and streamlining the user experience.

2013 **Teaching Fellow - Fundamentals of Computer Science**, *Vienna University of Technology*.

- Held lectures about programming, algorithms, design patterns, etc.

2012 **Software Engineer - Internship**, *ETM Control GMBH*.

- Developed a HTML/JavaScript based mobile client for a complex supervisory control system.

Education

2011-2014 **BSc, Software and Information Engineering**, *Vienna University of Technology*.

Expertise and skills

Languages Python, C#, Java

Platforms GCP, Azure, Android

Technologies GenAI, VertexAI, k8s, terraform

Certifications 3 x Google Cloud Certified Professional

4 x Microsoft Certified Solution Professional

Languages

German **native**

English **fluent**
